PREFACE

The Annual Report of the Trade of Canada for 1948 is published in three Volumes.

Volume I contains summary tables, analytical tables, and Canadian trade with each country by principal commodities.

Volume II contains exports by commodities and countries.

Volume III contains imports by commodities and countries.

On January 1, 1948, the following became effective:—1. Pakistan was shown separately. 2. Burma was shown as a Foreign Country.

The Report was compiled in the External Trade Section of the Bureau under the direction of Mr. L. A. Kane, Chief.

HERBERT MARSHALL,
Dominion Statistician.

Dominion Bureau of Statistics,
Ottawa, Canada.

PRÉFACE

Le Rapport Annuel du Commerce du Canada pour 1948 paraît en trois volumes.

Le volume I contient des tableaux sommaires, des tableaux analytiques, et le commerce canadien avec chaque pays par principales denrées.

Le volume II donne les exportations par denrées et par pays.

Le volume III donne les importations par denrées et par pays.

Les changements suivants ont été apportés aux rubriques ci-dessous le ler janvier 1948:—1. Le Pakistan apparaissait séparément. 2. La Birmanie apparaissait comme un pays étranger.

Le Rapport a été compilé par la Section du Commerce Extérieur du Bureau sous la direction de M. L. A. Kane, chef.

HERBERT MARSHALL,
Statisticien du Dominion.

Bureau Fédéral de la Statistique,
Ottawa, Canada.

EXPLANATORY NOTES

1. In all the tables of imports and exports in this Report, the quantities and values are based upon the declarations of importers (import entries) and of exporters (export entries), as subsequently checked by Customs officials.

2. Weight, where shown, is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs tariff.

3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

4. In this Report are trade items such as "Washing machines and parts" and "Internal combustion engines and parts", etc., etc., which show both quantities and values. In the item "Washing machines and parts" the quantity represents the number of "Complete washing machines" only, while the value represents not only the value of the specified number of the complete washing machines but also the value of all kinds of "Parts" of washing machines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.

5. "Imports" means "Imports entered for Consumption". "Entered for Consumption" does not imply that the goods have been actually consumed in Canada, but that they have passed into the custody of the importer and that duty has been paid on the dutiable portion.

6. For statistical purposes, the value of merchandise imported, as shown in this Report, is the value as determined for Customs duty purposes. In most cases, this would be the invoice value of the goods converted to Canadian dollars at authorized exchange ratios. The value does not include charges such as freight, insurance, handling, duties or taxes.

7. "Exports of Canadian Produce" include not only articles of purely Canadian origin but also imported articles of foreign origin which have been changed in form or enhanced in value by further manufacture in Canada, such as sugar refined from imported raw sugar, and rubber goods made from imported unmanufactured rubber.

8. The value of "Exports of Canadian Produce" is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges.

9. "Exports of Foreign Produce" consist of "Imports entered for Consumption" (see no. 5 above), which have been exported from Canada in the same condition as when imported. The value is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges, when exported from Canada.

10. Imports into Canada are classified as received from the countries whence they were consigned to Canada. The countries of consignment are the countries from which the goods have come, without interruption of transit, except in the course of transhipment or transfer from one conveyance to another. The countries whence goods are consigned are not necessarily the countries of actual origin, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval to Canada. In such cases the second country would be the country of consignment to which the goods would be credited. An example is the case of tea grown in the Orient but purchased in the bonded market in London, England; Canadian statistics record such imports as coming from the United Kingdom.

11. Exports from Canada are credited to the country to which they are consigned, whether that country possesses a seaboard or not. The country of consignment is the country to which goods exported from Canada are intended to pass, without interruption of transit, except in the course of transhipment or transfer from one means of conveyance to another.

12. *Ports.*—The Table of the Trade of Canada, by Ports and Provinces, shows that merchandise was imported or exported at these ports; but this does not imply that goods imported at any port were for home consumption there or even in the province in which the port is situated, neither does it imply that goods exported at any port originated there or even in the province in which the port is situated.

13. The initials "N.O.P." mean "not otherwise provided for".

NOTES EXPLICATIVES

1. Toutes les indications de volume et de valeur que l'on trouvera dans cet ouvrage sont basées sur les déclarations des importateurs et des exportateurs (documents d'importation et d'exportation), subséquemment vérifiées par les fonctionnaires des douanes.

2. Partout où il est question de poids, il s'agit du poids net des marchandises, c'est-à-dire que le poids des emballages, récipients, etc. n'y est pas compris, sauf certaines exceptions énumérées au tarif des douanes.

3. L'expression «ton» signifie 2,000 livres et «cwt.» (ou quintal) 100 livres avoirdupoids. Lorsqu'on se sert d'autres unités, il convient d'adopter le standard impérial de poids et mesures.

4. Dans ce rapport on trouve des item comme «lessiveuses et pièces» et «moteurs à combustion interne et leurs pièces de rechange», etc., etc., montrant les quantités et les valeurs. Dans le cas de «lessiveuses et pièces» la quantité représente le nombre de «lessiveuses complètes» seulement, et la valeur représente non seulement celle des lessiveuses complètes mais aussi celle de toutes les «parties» ou «pièces» de lessiveuses; c'est pourquoi, dans cet item et autres semblables, il est impossible d'établir la valeur moyenne par unité.

5. «Importations» signifie «importations entrées pour la consommation». «Entrées pour la consommation» n'implique pas que ces marchandises sont nécessairement consommées au Canada, mais qu'elles ont été livrées à l'importateur qui a payé les droits sur telle partie imposable de ces marchandises.

6. Pour des fins de statistique, la valeur des marchandises importées indiquée dans le présent rapport est celle qui a été déterminée pour fins de droits de douane. Dans la plupart des cas, cette valeur sera la valeur de facture des marchandises, convertie en dollars canadiens au taux autorisé du change. Elle ne comprend pas les frais tels que le fret, l'assurance, la manutention, les droits ou taxes.

7. Les «exportations de produits canadiens» comprennent non seulement les articles d'origine purement canadienne, mais aussi les articles importés d'origine étrangère qui ont été modifiés dans leur forme ou augmentés en valeur par une plus ample transformation au Canada, comme le sucre raffiné après avoir été importé à l'état brut, les articles fabriqués avec du caoutchouc brut importé.

8. La valeur des «exportations de produits canadiens» est le montant réel reçu, exprimé en dollars canadiens, à l'exclusion du fret, des assurances, de la manutention et des autres frais.

9. Les «exportations de produits étrangers» comprennent les «importations entrées pour la consommation» (voir le n° 5 ci-dessus) qui ont été exportées du Canada dans le même état qu'à leur entrée. La valeur est le montant réel reçu, exprimé en dollars canadiens, à l'exclusion du fret, des assurances, de la manutention et des autres frais, quand les marchandises sont exportées du Canada.

10. Les importations au Canada sont attribuées aux pays d'où elles ont été consignées au Canada. Les pays de consignation sont les pays d'où viennent les marchandises, sans autre interruption de transit que les transbordements inéluctables. Les pays d'où les marchandises sont consignées ne sont pas nécessairement les pays d'origine, car les marchandises produites dans un certain pays peuvent avoir été achetées par une firme d'un autre pays, d'où elles peuvent être expédiées au Canada après une période plus ou moins longue. Dans ce cas, l'attribution de ces marchandises est faite au second pays, considéré comme pays de consignation. Il en sera ainsi, par exemple, du thé récolté en Orient mais acheté sur le marché de Londres, Angleterre; les statistiques canadiennes considèrent ces importations comme venant du Royaume-Uni.

11. Les exportations du Canada sont attribuées au pays où elles sont consignées, même si ce pays ne possède pas de port de mer. Le pays de consignation est le pays que les marchandises exportées du Canada doivent finalement atteindre sans interruption de transit autre que les transbordements inéluctables.

12. *Ports.*—Le tableau du commerce du Canada, par port et province, montre les marchandises importées ou exportées par ces ports, mais il n'en faut pas conclure que les marchandises importées par un port quelconque sont pour la consommation de la province où est situé le port, ou que les marchandises exportées sont produites par la province où est situé le port de sortie.

13. Les initiales «n.a.é.» signifient «non autrement énuméré».

GOLD IN CANADIAN TRADE STATISTICS

The publication of statistics showing the gross imports and exports of gold has been temporarily suspended as from September, 1939. Statistics for periods prior to this time have been accordingly revised to exclude all gold formerly included in the total of merchandise exports.

Statistics showing the net exports of non-monetary gold, including changes in stocks held under earmark, are published as a supplement to the trade figures, and are given below.

Exports of gold in Canadian trade statistics were distinguished in previous reports as between monetary and non-monetary. Monetary gold exports were described as those which entailed a reduction in the Dominion's monetary gold stocks. All other gold exported (classed as non-monetary) were shown as merchandise, and included with the total merchandise exports.

The fact that gold is a money metal gives it peculiar attributes which distinguish it from other commodities in trade. In particular, the movement of gold in international trade is determined almost exclusively by monetary factors. The amount of exports may fluctuate widely from month to month owing to other than ordinary trade or commercial considerations. In addition, gold is generally acceptable. It does not have to surmount tariff barriers and is normally assured a market at a relatively fixed price. For these reasons, provision was made in previous trade reports for a supplementary table showing exports from Canada excluding all gold.

It is further to be noted that gold does not move in international trade in any direct or normal relation to sales and purchases. It may be bought or sold abroad without moving in or out across the frontier, the sales or purchases in such cases being recognized by simply setting aside or "earmarking" the gold in the vaults of the central bank. Trade statistics deal only with physical movements, sales or purchases of gold which do not involve an actual movement being more properly regarded as an "invisible item" and taken care of in the "International Balance of Payments" statements. Changes in the Bank of Canada's stock of gold under earmark do not enter, therefore, into the trade statistics.

L'OR DANS LES STATISTIQUES DU COMMERCE CANADIEN

La publication des statistiques relatives aux importations et exportations brutes d'or a été temporairement suspendue depuis septembre 1939. Les statistiques pour les périodes antérieures à cette date ont été revisées en conséquence, de manière à exclure tout l'or qui entrait auparavant dans le total des exportations de marchandises.

Les statistiques montrant les exportations nettes d'or non monétaire, y compris les changements dans les stocks affectés, sont publiées comme supplément aux chiffres sur le commerce et sont données ci-dessous.

Dans les rapports précédents les exportations d'or dans les statistiques du commerce canadien comprenaient l'or monétaire et l'or non monétaire. Les exportations d'or monétaire y étaient décrites comme celles qui entraînent une diminution des stocks d'or monétaire du Dominion. Toutes les autres exportations d'or (classifié comme non monétaire) étaient regardées comme marchandises et comprises dans les exportations globales de marchandises.

Le fait que l'or est un métal-monnaie lui donne des attributs spéciaux qui le distinguent des autres denrées dans le commerce. En particulier le mouvement de l'or dans le commerce international est déterminé presque exclusivement par des facteurs monétaires. Le volume des exportations peut largement fluctuer d'un mois à l'autre à cause de considérations autres que celles de l'échange et du commerce ordinaires. En outre, l'or est généralement acceptable. Il n'a pas à surmonter les barrières tarifaires, et un marché lui est normalement assuré à un prix relativement fixe. Pour ces raisons les rapports antérieurs sur le commerce fournissaient un tableau supplémentaire sur les exportations canadiennes, à l'exclusion de l'or.

De plus, il faut observer que dans le commerce international l'or ne se déplace pas en relation directe ou normale avec les ventes et les achats. Il peut s'acheter ou se vendre à l'étranger sans entrée ou sortie à la frontière; en ces cas, les ventes ou les achats sont reconnus en mettant simplement de côté ou en «affectant» l'or dans les chambres fortes de la banque centrale. Les statistiques du commerce n'ont trait qu'aux mouvements physiques; les ventes et les achats d'or qui ne comportent pas un mouvement réel sont plus proprement regardés comme un «item invisible», et ils prennent place dans les états de la «Balance des paiements internationaux». Les changements dans les stocks d'or affecté de la Banque du Canada ne paraissent donc pas dans les statistiques du commerce

* In this classification the expression "Canadian Farm Products" refers, in the case of Exports, to commodities actually produced in their original form on Canadian farms. In the case of Imports, it covers all commodities of which the basic raw materials are such as Canadian farms produce. "Foreign Farm Products" covers, in both Imports and Exports, materials or commodities such as Canada does not produce, *e.g.*—cane sugar, tea, rubber, cotton, silk, etc.

PREFACE

The Annual Report of the Trade of Canada for 1949 is published in three Volumes.

Volume I contains summary tables, analytical tables, and Canadian trade with each country by principal commodities.

Volume II contains exports by commodities and countries.

Volume III contains imports by commodities and countries.

On January 1, 1949, the following became effective:—1. Arabia and Transjordan were shown separately; prior to 1949 Arabia was included in Aden, and Transjordan in Palestine. 2. Palestine was shown as a Foreign Country. 3. Abyssinia was renamed Ethiopia; Salvador, El Salvador; San Domingo, Dominican Republic; Soviet Union, U.S.S.R.; and Guam, United States Oceania.

On March 31, 1949, Newfoundland became a Province of Canada. Therefore, as from April 1, 1949, the trade of Newfoundland is included in the trade of Canada.

The trade of Newfoundland for 1949 relates to the three months January to March.

The Report was compiled in the External Trade Section of the International Trade Division under the direction of Mr. L. A. Kane, Chief.

HERBERT MARSHALL,
Dominion Statistician.

Dominion Bureau of Statistics,
Ottawa, Canada.

PRÉFACE

Le Rapport Annuel du Commerce du Canada pour 1949 paraît en trois volumes.

Le volume I contient des tableaux sommaires, des tableaux analytiques, et le commerce canadien avec chaque pays par principales denrées.

Le volume II donne les exportations par denrées et par pays.

Le volume III donne les importations par denrées et par pays.

Le 1er janvier 1949, les changements suivants ont été mis en vigueur:—1. L'Arabie et la Transjordanie sont indiquées séparément; avant 1949, l'Arabie était comprise avec Aden, et la Transjordanie, avec la Palestine. 2. La Palestine est indiquée comme pays étranger. 3. L'Abyssinie redevient l'Éthiopie; Saint-Domingue, République dominicaine; Union soviétique, URSS; et Guam, Océanie des États-Unis.

Le 31 mars 1949, Terre-Neuve devient une province du Canada. Par conséquent, à compter du 1er avril 1949, le commerce de Terre-Neuve figure dans celui du Canada.

Le commerce de Terre-Neuve en 1949 est celui des trois mois de janvier à mars.

Le Rapport a été compilé par la Section du commerce extérieur de la Division du commerce international sous la direction de M. L. A. Kane, chef.

HERBERT MARSHALL,
Statisticien du Dominion.

Bureau Fédéral de la Statistique,
Ottawa, Canada.

EXPLANATORY NOTES

1. In all the tables of imports and exports in this Report, the quantities and values are based upon the declarations of importers (import entries) and of exporters (export entries), as subsequently checked by Customs officials.

2. Weight, where shown, is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs tariff.

3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

4. In this Report are trade items such as "Internal combustion engines and parts", etc., etc., which show both quantities and values. In this item "Internal combustion engines and parts" the quantity represents the number of "Complete engines" only, while the value represents not only the value of the specified number of complete engines but also the value of all kinds of "Parts" of engines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.

5. "Imports" means "Imports entered for Consumption". "Entered for Consumption" does not imply that the goods have been actually consumed in Canada, but that they have passed into the custody of the importer and that duty has been paid on the dutiable portion.

6. For statistical purposes, the value of merchandise imported, as shown in this Report, is the value as determined for Customs duty purposes. In most cases, this would be the invoice value of the goods converted to Canadian dollars at authorized exchange ratios. The value does not include charges such as freight, insurance, handling, duties or taxes.

7. "Exports of Canadian Produce" include not only articles of purely Canadian origin but also imported articles of foreign origin which have been changed in form or enhanced in value by further manufacture in Canada, such as sugar refined from imported raw sugar, and rubber goods made from imported unmanufactured rubber.

8. The value of "Exports of Canadian Produce" is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges.

9. "Exports of Foreign Produce" consist of "Imports entered for Consumption" (see no. 5 above), which have been exported from Canada in the same condition as when imported. The value is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges, when exported from Canada.

10. Imports into Canada are classified as received from the countries whence they were consigned to Canada. The countries of consignment are the countries from which the goods have come, without interruption of transit, except in the course of transhipment or transfer from one conveyance to another. The countries whence goods are consigned are not necessarily the countries of actual origin, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to Canada. In such cases the second country would be the country of consignment to which the goods would be credited. An example is the case of tea grown in the Orient but purchased in the bonded market in London, England; Canadian statistics record such imports as coming from the United Kingdom.

11. Exports from Canada are credited to the country to which they are consigned, whether that country possesses a seaboard or not. The country of consignment is the country to which goods exported from Canada are intended to pass, without interruption of transit, except in the course of transhipment or transfer from one means of conveyance to another.

12. *Ports.*—The Table of the Trade of Canada, by Ports and Provinces, shows that merchandise was imported or exported at these ports; but this does not imply that goods imported at any port were for home consumption there or even in the province in which the port is situated, neither does it imply that goods exported at any port originated there or even in the province in which the port is situated.

13. The initials "N.O.P." mean "not otherwise provided for".

NOTES EXPLICATIVES

1. Toutes les indications de volume et de valeur que l'on trouvera dans cet ouvrage sont basées sur les déclarations des importateurs et des exportateurs (documents d'importation et d'exportation), subséquemment vérifiées par les fonctionnaires des douanes.

2. Partout où il est question de poids, il s'agit du poids net des marchandises, c'est-à-dire que le poids des emballages, récipients, etc. n'y est pas compris, sauf certaines exceptions énumérées au tarif des douanes.

3. L'expression «ton» signifie 2,000 livres et «cwt.» (ou quintal) 100 livres avoirdupoids. Lorsqu'on se sert d'autres unités, il convient d'adopter le standard impérial de poids et mesures.

4. Dans ce rapport on trouve des item comme «moteurs à combustion interne et leurs pièces», etc., etc., montrant les quantités et les valeurs. Dans le cas de «moteurs à combustion interne et leurs pièces» la quantité représente le nombre de «moteurs complets» seulement, et la valeur représente non seulement celle des moteurs complets mais aussi celle de toutes les «pièces» de moteurs; c'est pourquoi, dans cet item et autres semblables, il est impossible d'établir la valeur moyenne par unité.

5. «Importations» signifie «importations entrées pour la consommation». «Entrées pour la consommation» n'implique pas que ces marchandises sont nécessairement consommées au Canada, mais qu'elles ont été livrées à l'importateur qui a payé les droits sur telle partie imposable de ces marchandises.

6. Pour des fins de statistique, la valeur des marchandises importées indiquée dans le présent rapport est celle qui a été déterminée pour fins de droits de douane. Dans la plupart des cas, cette valeur sera la valeur de facture des marchandises, convertie en dollars canadiens au taux autorisé du change. Elle ne comprend pas les frais tels que le fret, l'assurance, la manutention, les droits ou taxes.

7. Les «exportations de produits canadiens» comprennent non seulement les articles d'origine purement canadienne, mais aussi les articles importés d'origine étrangère qui ont été modifiés dans leur forme ou augmentés en valeur par une plus ample transformation au Canada, comme le sucre raffiné après avoir été importé à l'état brut, les articles fabriqués avec du caoutchouc brut importé.

8. La valeur des «exportations de produits canadiens» est le montant réel reçu, exprimé en dollars canadiens, à l'exclusion du fret, des assurances, de la manutention et des autres frais.

9. Les «exportations de produits étrangers» comprennent les «importations entrées pour la consommation» (voir le n° 5 ci-dessus) qui ont été exportées du Canada dans le même état qu'à leur entrée. La valeur est le montant réel reçu, exprimé en dollars canadiens, à l'exclusion du fret, des assurances, de la manutention et des autres frais, quand les marchandises sont exportées du Canada.

10. Les importations au Canada sont attribuées aux pays d'où elles ont été consignées au Canada. Les pays de consignation sont les pays d'où viennent les marchandises, sans autre interruption de transit que les transbordements inéluctables. Les pays d'où les marchandises sont consignées ne sont pas nécessairement les pays d'origine, car les marchandises produites dans un certain pays peuvent avoir été achetées par une firme d'un autre pays, d'où elles peuvent être expédiées au Canada après une période plus ou moins longue. Dans ce cas, l'attribution de ces marchandises est faite au second pays, considéré comme pays de consignation. Il en sera ainsi, par exemple, du thé récolté en Orient mais acheté sur le marché de Londres, Angleterre; les statistiques canadiennes considèrent ces importations comme venant du Royaume-Uni.

11. Les exportations du Canada sont attribuées au pays où elles sont consignées, même si ce pays ne possède pas de port de mer. Le pays de consignation est le pays que les marchandises exportées du Canada doivent finalement atteindre sans interruption de transit autre que les transbordements inéluctables.

12. *Ports.*—Le tableau du commerce du Canada, par port et province, montre les marchandises importées ou exportées par ces ports, mais il n'en faut pas conclure que les marchandises importées par un port quelconque sont pour la consommation de la province où est situé le port, ou que les marchandises exportées sont produites par la province où est situé le port de sortie.

13. Les initiales «n.a.é.» signifient «non autrement énuméré».

GOLD IN CANADIAN TRADE STATISTICS

The publication of statistics showing the gross imports and exports of gold has been temporarily suspended as from September, 1939. Statistics for periods prior to this time have been accordingly revised to exclude all gold formerly included in the total of merchandise exports.

Statistics showing the net exports of non-monetary gold, including changes in stocks held under earmark, are published as a supplement to the trade figures, and are given below.

Exports of gold in Canadian trade statistics were distinguished in previous reports as between monetary and non-monetary. Monetary gold exports were described as those which entailed a reduction in the Dominion's monetary gold stocks. All other gold exported (classed as non-monetary) were shown as merchandise, and included with the total merchandise exports.

The fact that gold is a money metal gives it peculiar attributes which distinguish it from other commodities in trade. In particular, the movement of gold in international trade is determined almost exclusively by monetary factors. The amount of exports may fluctuate widely from month to month owing to other than ordinary trade or commercial considerations. In addition, gold is generally acceptable. It does not have to surmount tariff barriers and is normally assured a market at a relatively fixed price. For these reasons, provision was made in previous trade reports for a supplementary table showing exports from Canada excluding all gold.

It is further to be noted that gold does not move in international trade in any direct or normal relation to sales and purchases. It may be bought or sold abroad without moving in or out across the frontier, the sales or purchases in such cases being recognized by simply setting aside or "earmarking" the gold in the vaults of the central bank. Trade statistics deal only with physical movements, sales or purchases of gold which do not involve an actual movement being more properly regarded as an "invisible item" and taken care of in the "International Balance of Payments" statements. Changes in the Bank of Canada's stock of gold under earmark do not enter, therefore, into the trade statistics.

L'OR DANS LES STATISTIQUES DU COMMERCE CANADIEN

La publication des statistiques relatives aux importations et exportations brutes d'or a été temporairement suspendue depuis septembre 1939. Les statistiques pour les périodes antérieures à cette date ont été revisées en conséquence, de manière à exclure tout l'or qui entrait auparavant dans le total des exportations de marchandises.

Les statistiques montrant les exportations nettes d'or non monétaire, y compris les changements dans les stocks affectés, sont publiées comme supplément aux chiffres sur le commerce et sont données ci-dessous.

Dans les rapports précédents les exportations d'or dans les statistiques du commerce canadien comprenaient l'or monétaire et l'or non monétaire. Les exportations d'or monétaire y étaient décrites comme celles qui entraînent une diminution des stocks d'or monétaire du Dominion. Toutes les autres exportations d'or (classifié comme non monétaire) étaient regardées comme marchandises et comprises dans les exportations globales de marchandises.

Le fait que l'or est un métal-monnaie lui donne des attributs spéciaux qui le distinguent des autres denrées dans le commerce. En particulier le mouvement de l'or dans le commerce international est déterminé presque exclusivement par des facteurs monétaires. Le volume des exportations peut largement fluctuer d'un mois à l'autre à cause de considérations autres que celles de l'échange et du commerce ordinaires. En outre, l'or est généralement acceptable. Il n'a pas à surmonter les barrières tarifaires, et un marché lui est normalement assuré à un prix relativement fixe. Pour ces raisons les rapports antérieurs sur le commerce fournissaient un tableau supplémentaire sur les exportations canadiennes, à l'exclusion de l'or.

De plus, il faut observer que dans le commerce international l'or ne se déplace pas en relation directe ou normale avec les ventes et les achats. Il peut s'acheter ou se vendre à l'étranger sans entrée ou sortie à la frontière; en ces cas, les ventes ou les achats sont reconnus en mettant simplement de côté ou en «affectant» l'or dans les chambres fortes de la banque centrale. Les statistiques du commerce n'ont trait qu'aux mouvements physiques; les ventes et les achats d'or qui ne comportent pas un mouvement réel sont plus proprement regardés comme un «item invisible», et ils prennent place dans les états de la «Balance des paiements internationaux». Les changements dans les stocks d'or affecté de la Banque du Canada ne paraissent donc pas dans les statistiques du commerce.

* In this classification the expression "Canadian Farm Products" refers, in the case of Exports, to commodities actually produced in their original form on Canadian farms. In the case of Imports, it covers all commodities of which the basic raw materials are such as Canadian farms produce. "Foreign Farm Products" covers, in both Imports and Exports, materials or commodities such as Canada does not produce, *e.g.*—cane sugar, tea, rubber, cotton, silk, etc.

COMPARISONS OF THE VALUE AND PHYSICAL VOLUME OF IMPORTS AND EXPORTS

Changes in the values of imports and exports over a period may be caused by variations in quantity, by fluctuations in prices or by a combination of these factors. If prices should happen to fall between two given dates when the aggregate nominal values of imports and exports decline, or if they should rise when the nominal values increase, it is clearly possible that there may be no corresponding decline or increase in the amount of goods imported or exported. Quantities may even rise when nominal values decline, or may fall off when nominal values rise. It is desirable, therefore, to isolate each of the two factors of price and quantity in order to observe the relative effects of their movement apart from the combined effect exhibited by trade values.

Table No. 38, on the following page, presents a comparison of the physical volume of imports for consumption and of exports of Canadian produce with the nominal or declared values in the forms of constant dollar totals and of currently weighted indexes. New interim indexes of the prices of imports for consumption and of exports of Canadian produce have been developed recently at the Bureau, on a post-war base, to facilitate this comparison.(1)

The price indexes utilized as "deflators" of the values and value indexes in the table, however, differ somewhat from the conventional trade statistics in their grouping though the nature of component material principle of classification governs the order of the arrangement. This circumstance is determined by the problems of pricing. Nominal (or declared) values, value indexes and the physical volume resultants of division by the price indexes are, consequently, grouped according to the price index group samples. The two groups which are designated usually as agricultural and vegetable products and animals and animal products have been combined into group I, agricultural and other primary products, in these calculations; with a sub-group of rubber and its products transferred to the miscellaneous group because of the high proportion of synthetic rubber associated with these products. Other group adjustments, such as the transfer of ships from the miscellaneous to the iron and steel and products group, are minor. Their effect is to improve the group comparability over a time period.

Imports into Canada for the use of the United Kingdom Government are deleted from the totals in order to facilitate comparisons of imports for consumption with exports of Canadian produce. (Temporary trade and gold figures are ordinarily excluded from merchandise trade statistics, by definition). Approximate calculations of the net barter terms of trade by means of the ratio of import prices to export prices are especially facilitated by this deduction, though a simple calculation utilizing these two price indexes does not account for a small influence due to change in the prices of exports of foreign produce.

A sub-division of the miscellaneous group, termed special and non-commercial transactions, is designed to distinguish unilateral transactions—such as donations and gifts—and transactions with mixed financial elements from the ordinary trade content. The double character of the miscellaneous group of trade transactions is thus emphasized by the distinction made between the ordinary commercial transactions and those which contain invisible elements. The special and non-commercial articles concerned are as follows:

Special and non-commercial trade transactions:

(a) Imports for consumption:

Settlers' effects;
Effects left by bequest;
Charitable donations;
Casual donations;
Presentations for lifesaving;
Articles for the use of the Governor General;
Articles for the use of representatives of Commonwealth and foreign governments;
Incidental purchases by Canadians returning from other countries;
Cinematograph film positives;
Advertising and printed matter.

(b) Exports of Canadian produce:

Settlers' effects;
Donations and gifts;
Contractors' outfits;
Motion picture films.

COMPARAISON DE LA VALEUR ET DU VOLUME PHYSIQUE DES IMPORTATIONS ET DES EXPORTATIONS

Les changements qui se produisent dans la valeur des importations et des exportations durant une certaine période peuvent être causés par les variations de la quantité, les fluctuations des prix ou par une combinaison de ces deux facteurs. Si les prix baissent entre deux dates données lorsque la valeur nominale globale des importations et des exportations diminue, ou s'ils montent lorsqu'elle augmente, il est très possible qu'il ne se produise pas de diminution ou d'augmentation correspondante dans la quantité de biens importés ou exportés. La quantité peut même augmenter alors que la valeur nominale diminue, ou diminuer lorsque celle-ci augmente. Il est donc préférable d'isoler chacun des deux facteurs, prix et quantité, afin de pouvoir observer les effets relatifs de leur mouvement en dehors de l'effet combiné reflété par la valeur du commerce.

Le tableau n° 38, à la page suivante, établit une comparaison entre le volume physique tant des importations pour la consommation que des exportations de produits canadiens et la valeur nominale, ou déclarée, sous forme de totaux en dollars constants et d'indices pondérés courants. Afin de faciliter cette comparaison, le Bureau a calculé récemment de nouveaux indices provisoires, basés sur l'après-guerre, des prix des importations pour la consommation et des exportations de produits canadiens (1).

Les indices de prix employés comme "dégonfleurs" des valeurs et les indices des valeurs des tableaux diffèrent cependant quelque peu, dans leur groupement, des statistiques conventionnelles du commerce, bien que la nature du principe de classement d'après la matière constituante régisse l'arrangement. Ce sont les problèmes que pose la fixation des prix qui déterminent cette circonstance. Les quotients de volume physique qui résultent de la division des valeurs nominales, ou déclarées, et des indices de valeur par les indices de prix sont, en conséquence, groupés d'après des échantillons des indices de prix de groupe. Dans ces calculs, les deux groupes qui sont ordinairement désignés comme produits agricoles et substances végétales et animaux et produits animaux ont été combinés dans le groupe I, produits agricoles et autres produits primaires; et un sous-groupe du caoutchouc et articles en caoutchouc a été transféré au groupe des "divers" en raison de la proportion élevée de caoutchouc synthétique associée à ces produits. D'autres ajustements de groupe, tels que le transfert des navires du groupe des "divers" au groupe "fer et acier et produits", sont d'importance secondaire. Ils ont pour effet d'améliorer la comparabilité entre les groupes au cours d'une période de temps.

Les importations au Canada pour la consommation du gouvernement du Royaume-Uni sont supprimées des totaux afin de faciliter la comparaison des importations pour consommation avec les exportations de produits canadiens. (Par définition, les chiffres du commerce temporaire et de l'or sont ordinairement exclus de la statistique du commerce des marchandises.) Cette déduction facilite particulièrement le calcul approximatif de la valeur d'échange nette du commerce au moyen du coefficient des prix des importations par rapport aux prix des exportations, bien qu'un simple calcul au moyen de ces deux indices de prix ne tienne pas compte d'une petite influence du change sur les prix des réexportations.

Une subdivision du groupe des divers, appelée "transactions spéciales et non commerciales" établit la distinction entre les transactions unilatérales (telles que les dons et cadeaux) et les transactions à éléments financiers mixtes, d'une part, et la composition ordinaire du commerce d'autre part. Le caractère double du groupe des transactions commerciales diverses ressort donc de la distinction établie entre les transactions commerciales ordinaires et celles qui contiennent des éléments invisibles. Les transactions spéciales et non commerciales sont les suivantes:

Transactions spéciales et non commerciales:

(a) Importations pour la consommation:

Effets de colon;
Effets légués;
Dons de charité;
Dons occasionnels;
Récompense pour sauvetage de la vie;
Articles pour l'usage du gouverneur général;
Articles pour l'usage des représentants des gouvernements du Commonwealth et étrangers;
Achats occasionnels, par les Canadiens revenant d'autres pays;
Pellicules cinématographiques positives;
Matières publicitaires et imprimées.

(b) Exportations de produits canadiens:

Effets de colon;
Dons et cadeaux;
Equipement d'entrepreneur;
Pellicules cinématographiques.

(1) Groups though classified by component material differ from conventional trade statistics' groups.

(2) Adjusted totals: Import trade content excludes imports for the use of the United Kingdom Government, temporary imports for exhibition or competition, gold; export trade content excludes exports of foreign produce, temporary exports for exhibition or competition, gold. Totals on the basis of 1948 declared values do not equal the sum of the group totals as a consequence of division of declared values by price indexes.

(3) Interim fixed base weighted indexes. See "Export and Import Price Indexes", Dominion Bureau of Statistics, July, 1949 (Reference Paper No. 5) for description of indexes on a 1935-39=100 base. Present series compiled as fixed base weighted price indexes with weighting system referring to 1948=100.

(1) Bien que les groupes soient classés d'après la matière constituante, ils diffèrent des groupes conventionnels de la statistique du commerce.

(2) Totaux rectifiés: Le commerce d'importation ne comprend pas les importations pour l'usage du gouvernement du Royaume-Uni, les importations temporaires pour expositions ou concours, l'or. Les totaux basés sur les valeurs déclarées de 1948 ne sont pas égaux à la somme des totaux de groupes en raison de la division des valeurs déclarées par le indices de prix.

(3) Indices pondérés provisoires à base fixe. Voir "Indices des prix des exportations et des importations" Bureau fédéral de la statistique, juillet 1949, (Document de référence n° 5) description des indices basés sur 1935–1939 à 100. La présente série est calculée en indices de prix pondérés à base fixe d'après un système de pondération basé sur 1948 établi à 100.

PREFACE

The Annual Report of the Trade of Canada for 1950 is published in three Volumes.

Volume I contains summary tables, analytical tables, and Canadian trade with each country by principal commodities.

Volume II contains exports by commodities and countries.

Volume III contains imports by commodities and countries.

Israel is included as a foreign country as from January 1, 1949; prior to 1949 the figures relate to Palestine.

On January 1, 1949, the following became effective:—British Malaya was renamed Federation of Malaya; Transjordan, Jordan; and Netherlands Guiana, Surinam. Ireland was shown as a Foreign Country.

On March 31, 1949, Newfoundland became a Province of Canada. Therefore, as from April 1, 1949, the trade of Newfoundland is included in the trade of Canada.

The trade of Newfoundland for 1949 relates to the three months January to March.

The Report was compiled in the External Trade Section of the International Trade Division under the direction of Mr. L. A. Kane, Chief.

PRÉFACE

Le Rapport Annuel du Commerce du Canada pour 1950 paraît en trois volumes.

Le volume I contient des tableaux sommaires, des tableaux analytiques, et le commerce canadien avec chaque pays par principales denrées.

Le volume II donne les exportations par denrées et par pays.

Le volume III donne les importations par denrées et par pays.

Israël est compris comme pays étranger à compter du 1er janvier 1949; avant 1949, les chiffres ont trait à la Palestine.

Le 1er janvier 1949, les changements suivants ont été mis en vigueur:—La Malaisie britannique devient la Fédération malaise; la Transjordanie, Jordanie; et la Guyane néerlandaise, Surinam. Irlande apparaissait comme un pays étranger.

Le 31 mars 1949, Terre-Neuve devient une province du Canada. Par conséquent, à compter du 1er avril 1949, le commerce de Terre-Neuve figure dans celui du Canada.

Le commerce de Terre-Neuve en 1949 est celui des trois mois de janvier à mars.

Le Rapport a été compilé par la Section du commerce extérieur de la Division du commerce international sous la direction de M. L. A. Kane, chef.

HERBERT MARSHALL,
Statisticien du Dominion.

EXPLANATORY NOTES

1. In all the tables of imports and exports in this Report, the quantities and values are based upon the declarations of importers (import entries) and of exporters (export entries), as subsequently checked by Customs officials.

2. Weight, where shown, is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs tariff.

3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

4. In this Report are trade items such as "Internal combustion engines and parts", etc., etc., which show both quantities and values. In this item "Internal combustion engines and parts" the quantity represents the number of "Complete engines" only, while the value represents not only the value of the specified number of complete engines but also the value of all kinds of "Parts" of engines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.

5. "Imports" means "Imports entered for Consumption". "Entered for Consumption" does not imply that the goods have been actually consumed in Canada, but that they have passed into the custody of the importer and that duty has been paid on the dutiable portion.

6. For statistical purposes, the value of merchandise imported, as shown in this Report, is the value as determined for Customs duty purposes. In most cases, this would be the invoice value of the goods converted to Canadian dollars at authorized exchange ratios. The value does not include charges such as freight, insurance handling, duties or taxes.

7. "Exports of Canadian Produce" include not only articles of purely Canadian origin but also imported articles of foreign origin which have been changed in form or enhanced in value by further manufacture in Canada, such as sugar refined from imported raw sugar, and rubber goods made from imported unmanufactured rubber.

8. The value of "Exports of Canadian Produce" is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges.

9. "Exports of Foreign Produce" consist of "Imports entered for Consumption" (see no. 5 above), which have been exported from Canada in the same condition as when imported. The value is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges, when exported from Canada.

10. Imports into Canada are classified as received from the countries whence they were consigned to Canada. The countries of consignment are the countries from which the goods have come, without interruption of transit, except in the course of transhipment or transfer from one conveyance to another. The countries whence goods are consigned are not necessarily the countries of actual origin, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to Canada. In such cases the second country would be the country of consignment to which the goods would be credited. An example is the case of tea grown in the Orient but purchased in the bonded market in London, England; Canadian statistics record such imports as coming from the United Kingdom.

11. Exports from Canada are credited to the country to which they are consigned, whether that country possesses a seaboard or not. The country of consignment is the country to which goods exported from Canada are intended to pass, without interruption of transit, except in the course of transhipment or transfer from one means of conveyance to another.

12. *Ports.*—The Table of the Trade of Canada, by Ports and Provinces, shows that merchandise was imported or exported at these ports; but this does not imply that goods imported at any port were for home consumption there or even in the province in which the port is situated, neither does it imply that goods exported at any port originated there or even in the province in which the port is situated.

13. The initials "N.O.P." mean "not otherwise provided for".

NOTES EXPLICATIVES

1. Toutes les indications de volume et de valeur que l'on trouvera dans cet ouvrage sont basées sur les déclarations des importateurs et des exportateurs (documents d'importation et d'exportation), subséquemment vérifiées par les fonctionnaires des douanes.

2. Partout où il est question de poids, il s'agit du poids net des marchandises, c'est-à-dire que le poids des emballages, récipients, etc., n'y est pas compris, sauf certaines exceptions énumérées au tarif des douanes.

3. L'expression «ton» signifie 2,000 livres et «cwt.» (ou quintal) 100 livres avoirdupoids. Lorsqu'on se sert d'autres unités, il convient d'adopter le standard impérial de poids et mesures.

4. Dans ce rapport on trouve des item comme «moteurs à combustion interne et leurs pièces», etc., etc., montrant les quantités et les valeurs. Dans le cas de «moteurs à combustion interne et leurs pièces» la quantité représente le nombre de «moteurs complets» seulement, et la valeur représente non seulement celle des moteurs complets mais aussi celle de toutes les «pièces» de moteurs; c'est pourquoi, dans cet item et autres semblables, il est impossible d'établir la valeur moyenne par unité.

5. «Importations» signifie «importations entrées pour la consommation». «Entrées pour la consommation» n'implique pas que ces marchandises sont nécessairement consommées au Canada, mais qu'elles ont été livrées à l'importateur qui a payé les droits sur telle partie imposable de ces marchandises.

6. Pour des fins de statistique, la valeur des marchandises importées indiquée dans le présent rapport est celle qui a été déterminée pour fins de droits de douane. Dans la plupart des cas, cette valeur sera la valeur de facture des marchandises, convertie en dollars canadiens au taux autorisé du change. Elle ne comprend pas les frais tels que le fret, l'assurance, la manutention, les droits ou taxes.

7. Les «exportations de produits canadiens» comprennent non seulement les articles d'origine purement canadienne, mais aussi les articles importés d'origine étrangère qui ont été modifiés dans leur forme ou augmentés en valeur par une plus ample transformation au Canada, comme le sucre raffiné après avoir été importé à l'état brut, les articles fabriqués avec du caoutchouc brut importé.

8. La valeur des «exportations de produits canadiens» est le montant réel reçu, exprimé en dollars canadiens, à l'exclusion du fret, des assurances, de la manutention et des autres frais.

9. Les «exportations de produits étrangers» comprennent les «importations entrées pour la consommation» (voir le n° 5 ci-dessus) qui ont été exportées du Canada dans le même état qu'à leur entrée. La valeur est le montant réel reçu, exprimé en dollars canadiens, à l'exclusion du fret, des assurances, de la manutention et des autres frais, quand les marchandises sont exportées du Canada.

10. Les importations au Canada sont attribuées aux pays d'où elles ont été consignées au Canada. Les pays de consignation sont les pays d'où viennent les marchandises, sans autre interruption de transit que les transbordements inéluctables. Les pays d'où les marchandises sont consignées ne sont pas nécessairement les pays d'origine, car les marchandises produites dans un certain pays peuvent avoir été achetées par une firme d'un autre pays, d'où elles peuvent être expédiées au Canada après une période plus ou moins longue. Dans ce cas, l'attribution de ces marchandises est faite au second pays, considéré comme pays de consignation. Il en sera ainsi, par exemple, du thé récolté en Orient mais acheté sur le marché de Londres, Angleterre; les statistiques canadiennes considèrent ces importations comme venant du Royaume-Uni.

11. Les exportations du Canada sont attribuées au pays où elles sont consignées, même si ce pays ne possède pas de port de mer. Le pays de consignation est le pays que les marchandises exportées du Canada doivent finalement atteindre sans interruption de transit autre que les transbordements inéluctables.

12. *Ports.*—Le tableau du commerce du Canada, par port et province, montre les marchandises importées ou exportées par ces ports, mais il n'en faut pas conclure que les marchandises importées par un port quelconque sont pour la consommation de la province où est situé le port, ou que les marchandises exportées sont produites par la province où est situé le port de sortie.

13. Les initiales «n.a.é.» signifient «non autrement énuméré».

GOLD IN CANADIAN TRADE STATISTICS

The publication of statistics showing the gross imports and exports of gold has been temporarily suspended as from September, 1939. Statistics for periods prior to this time have been accordingly revised to exclude all gold formerly included in the total of merchandise exports.

Statistics showing the net exports of non-monetary gold, including changes in stocks held under earmark, are published as a supplement to the trade figures, and are given below.

Exports of gold in Canadian trade statistics were distinguished in previous reports as between monetary and non-monetary. Monetary gold exports were described as those which entailed a reduction in the Dominion's monetary gold stocks. All other gold exported (classed as non-monetary) were shown as merchandise, and included with the total merchandise exports.

The fact that gold is a money metal gives it peculiar attributes which distinguish it from other commodities in trade. In particular, the movement of gold in international trade is determined almost exclusively by monetary factors. The amount of exports may fluctuate widely from month to month owing to other than ordinary trade or commercial considerations. In addition, gold is generally acceptable. It does not have to surmount tariff barriers and is normally assured a market at a relatively fixed price. For these reasons, provision was made in previous trade reports for a supplementary table showing exports from Canada excluding all gold.

It is further to be noted that gold does not move in international trade in any direct or normal relation to sales and purchases. It may be bought or sold abroad without moving in or out across the frontier, the sales or purchases in such cases being recognized by simply setting aside or "earmarking" the gold in the vaults of the central bank. Trade statistics deal only with physical movements, sales or purchases of gold which do not involve an actual movement being more properly regarded as an "invisible item" and taken care of in the "International Balance of Payments" statements. Changes in the Bank of Canada's stock of gold under earmark do not enter, therefore, into the trade statistics.

L'OR DANS LES STATISTIQUES DU COMMERCE CANADIEN

La publication des statistiques relatives aux importations et exportations brutes d'or a été temporairement suspendue depuis septembre 1939. Les statistiques pour les périodes antérieures à cette date ont été revisées en conséquence, de manière à exclure tout l'or qui entrait auparavant dans le total des exportations de marchandises.

Les statistiques montrant les exportations nettes d'or non monétaire, y compris les changements dans les stocks affectés, sont publiées comme supplément aux chiffres sur le commerce et sont données ci-dessous.

Dans les rapports précédents les exportations d'or dans les statistiques du commerce canadien comprenaient l'or monétaire et l'or non monétaire. Les exportations d'or monétaire y étaient décrites comme celles qui entraînent une diminution des stocks d'or monétaire du Dominion. Toutes les autres exportations d'or (classifié comme non monétaire) étaient regardées comme marchandises et comprises dans les exportations globales de marchandises.

Le fait que l'or est un métal-monnaie lui donne des attributs spéciaux qui le distinguent des autres denrées dans le commerce. En particulier le mouvement de l'or dans le commerce international est déterminé presque exclusivement par des facteurs monétaires. Le volume des exportations peut largement fluctuer d'un mois à l'autre à cause de considérations autres que celles de l'échange et du commerce ordinaires. En outre, l'or est généralement acceptable. Il n'a pas à surmonter les barrières tarifaires, et un marché lui est normalement assuré à un prix relativement fixe. Pour ces raisons les rapports antérieurs sur le commerce fournissaient un tableau supplémentaire sur les exportations canadiennes, à l'exclusion de l'or.

De plus, il faut observer que dans le commerce international l'or ne se déplace pas en relation directe ou normale avec les ventes et les achats. Il peut s'acheter ou se vendre à l'étranger sans entrée ou sortie à la frontière; en ces cas, les ventes ou les achats sont reconnus en mettant simplement de côté ou en «affectant» l'or dans les chambres fortes de la banque centrale. Les statistiques du commerce n'ont trait qu'aux mouvements physiques; les ventes et les achats d'or qui ne comportent pas un mouvement réel sont plus proprement regardés comme un «item invisible», et ils prennent place dans les états de la «Balance des paiements internationaux». Les changements dans les stocks d'or affecté de la Banque du Canada ne paraissent donc pas dans les statistiques du commerce.

* In this classification the expression "Canadian Farm Products" refers, in the case of Exports, to commodities actually produced in their original form on Canadian farms. In the case of Imports, it covers all commodities of which the basic raw materials are such as Canadian farms produce. "Foreign Farm Products" covers, in both Imports and Exports, materials or commodities such as Canada does not produce, *e.g.*—cane sugar, tea, rubber, cotton, silk, etc.

COMPARISONS OF THE VALUE AND PHYSICAL VOLUME OF EXPORTS AND IMPORTS

Changes in the values of exports or imports over a period may be caused by variations in quantities, by fluctuations in prices, or by a combination of these factors. If the general level of prices should rise between two given periods when the aggregate nominal values of exports or imports increase, or if prices should decline when nominal values decrease, it is clearly possible that there may be no corresponding increase or decrease in the quantity of goods exported or imported. Quantities may even decline while nominal values increase, or may increase while nominal values fall off. It is desirable, therefore, to isolate each of the two factors of price and quantity in order to observe the relative effects of their movements on trade values.

Table 38 presents a comparison of the declared values of domestic exports and imports in current dollars and in constant 1948 dollars, together with indexes on a 1948 base of the declared values, prices and physical volume (quantum) of Canada's trade. Tables 39–44 present the monthly record from July, 1945, of the value, price and volume indexes published regularly in the Trade of Canada monthly reports (1). Monthly indexes have not been calculated for the period prior to July, 1945, but an annual record from 1926 has been published (2).

The price indexes utilized as "deflators" of the values and value indexes differ somewhat from the conventional trade statistics in their grouping, though the component material principle of classification governs the order of their arrangement. The differences are due chiefly to problems of pricing. The chief change is that the two groups usually designated as "agricultural and vegetable products" and "animals and animal products" have been combined into one group, "agricultural and other primary products", with the sub-group "rubber and its products" transferred to the "miscellaneous" group because of its synthetic rubber content. Other adjustments are the transfer of ships from the "miscellaneous" group to the "iron and steel products" group, of plumbing and heating equipment from the "iron and steel products" group to the "non-ferrous metals" group (imports only), of phosphate rock from the "non-metallic minerals" group to the "chemicals and fertilizer" group (imports only), and of advertising matter from the "wood products" group to the "miscellaneous commodities" group (imports only).

Imports into Canada for the use of the United Kingdom government are deleted from total imports in order to increase the comparability of the import and export series. Gold statistics and temporary trade are now excluded from all Canadian merchandise trade statistics, by definition. Several of the transactions recorded in the miscellaneous commodities group are unilateral in character or have special characteristics which distinguish them from the ordinary content of trade. These are segregated in a special sub-group, miscellaneous special and non-commercial transactions, in order to emphasize their unusual character. The special and non-commercial articles concerned are as follows:

(a) **in imports:**

Settlers' effects;
Effects left by bequest;
Charitable donations;
Casual donations;
Presentations for lifesaving;
Articles for the use of the Governor General;
Articles for the use of diplomatic representatives;
Tourists' purchases;
Cinematograph film positives;
Advertising and printed matter.

(b) **in exports:**

Settlers' effects;
Donations and gifts;
Contractors' outfits;
Motion picture films.

(1) For a detailed description of these series see "Export and Import Price Indexes by Months, July, 1945—June, 1950 (1948=100)", Dominion Bureau of Statistics, 1950 (Reference Paper No. 8).

(2) For the earlier annual data see "Export and Import Price Indexes, 1926—1948 (1935-9=100)", Dominion Bureau of Statistics, 1949 (Reference Paper No. 5).

COMPARAISON DE LA VALEUR ET DU VOLUME PHYSIQUE DES EXPORTATIONS ET DES IMPORTATIONS

Les changements que subit la valeur des exportations et des importations au cours d'une période peuvent résulter des variations de la quantité, des fluctuations des prix ou de la conjugaison de ces deux facteurs. Si le niveau général des prix augmente entre deux périodes lorsque la valeur nominale globale des exportations ou des importations augmente, ou si les prix baissent lorsque la valeur nominale diminue, il est fort possible qu'il n'y ait pas d'augmentation ou de diminution correspondante de la quantité de marchandises exportées ou importées. La quantité peut même diminuer alors que la valeur nominale augmente ou encore augmenter alors que la valeur diminue. Il convient donc d'isoler chacun des deux facteurs, prix et quantité, afin de pouvoir observer les effets relatifs de leur mouvement sur la valeur du commerce.

Le tableau 38 fait la comparaison de la valeur déclarée des exportations et des importations domestiques en dollars valeur courante et en dollars valeur constante de 1948 et donne les indices, fondés sur 1948, de la valeur déclarée, des prix et du volume physique (quantum) du commerce du Canada. Les tableaux 39–44 donnent l'état mensuel depuis 1945 des indices de la valeur, des prix et du volume publiés régulièrement dans les rapports mensuels Commerce du Canada (1). Il n'existe pas d'indices mensuels pour la période antérieure à juillet 1945 mais un état annuel à compter de 1926 a déjà paru (2).

Les indices de prix employés comme "dégonfleurs" des valeurs et les indices des valeurs diffèrent un peu, quant à leur groupement, des statistiques classiques du commerce, bien que le principe du classement d'après la matière constituante en régisse la disposition. Les différences tiennent surtout aux problèmes que pose la fixation des prix. Voici le principal changement: les deux groupes habituellement désignés "produits agricoles et substances végétales" et "animaux et produits animaux" sont réunis en un même groupe, produits agricoles et autres produits primaires, tandis que le sous-groupe "caoutchouc et articles en caoutchouc" est transféré au groupe "divers" parce qu'il renferme une proportion de caoutchouc synthétique. Les autres modifications tiennent au transfert des navires du groupe "divers" au groupe "fer et acier et produits", de l'équipement de plomberie et de chauffage du groupe "fer et acier et produits" au groupe "métaux non ferreux" (importations seulement), de la roche phosphatée du groupe "métalloïdes" au groupe "produits chimiques et engrais" (importations seulement), et des matières publicitaires du groupe "produits du bois" au groupe "marchandises diverses" (importations seulement).

Les importations au Canada à l'usage du gouvernement du Royaume-Uni sont supprimées des importations globales afin de rendre plus comparables les séries des importations et des exportations. La statistique de l'or et le commerce provisoire sont maintenant exclus, par définition, de la statistique générale du commerce canadien de denrées. Plusieurs des opérations figurant au groupe des marchandises diverses sont de nature unilatérale ou comportent des caractéristiques spéciales qui les distinguent du commerce ordinaire. Ces opérations sont réunies en un sous-groupe spécial, opérations spéciales et non commerciales diverses, afin d'en faire ressortir le caractère exceptionnel. Voici sur quoi portent ces opérations spéciales:

a) Importations:

effets de colon;
effets légués;
dons de charité;
dons occasionnels;
récompenses pour sauvetage de la vie;
articles à l'usage du gouverneur général;
articles à l'usage des représentants diplomatiques;
achats des touristes;
pellicules cinématographiques positives;
matières publicitaires et imprimés.

b) Exportations:

effets de colon;
dons et cadeaux;
équipement d'entrepreneur;
pellicules cinématographiques.

(1) Ces séries sont expliquées en détail dans "Indices des prix des exportations et des importations, par mois, juillet 1945—juin 1950 (1948=100)", Bureau fédéral de la statistique, 1950 (Document de référence n° 8).

(2) Les données annuelles antérieures se trouvent dans "Indices des prix des exportations et des importations, 1926—1948 (1935-9=100)", Bureau fédéral de la statistique, 1949 (Document de référence n° 5).

(1) The groups presented in these tables are adjusted to improve group coverage for pricing purposes. See notes at the beginning of these tables.

(2) Adjusted totals: Import trade content excludes imports for the use of the United Kingdom Government, temporary imports for exhibition or competition, gold; export trade content excludes exports of foreign produce, temporary exports for exhibition or competition, gold. Totals on the basis of 1948 declared values do not equal the sum of the group totals as a consequence of division of declared values by price indexes.

(1) Les groupes figurant à ces tableaux sont remaniés de manière à les rendre plus compréhensifs quant aux prix. Voir la note au début des tableaux.

(2) Totaux rectifiés: Le commerce d'importation ne comprend pas les importations pour l'usage du gouvernement du Royaume-Uni, les importations temporaires pour expositions ou concours, l'or. Les totaux basés sur les valeurs déclarées de 1948 ne sont pas égaux à la somme des totaux de groupes en raison de la division des valeurs déclarées par les indices des prix.
